Administrator screen shown. Update and Delete functions only available to Administrator.

### USER FEATURES

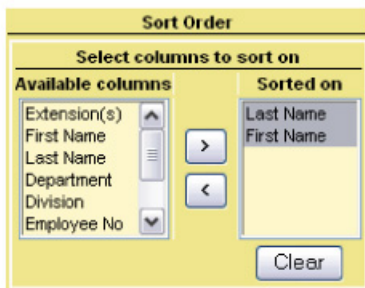

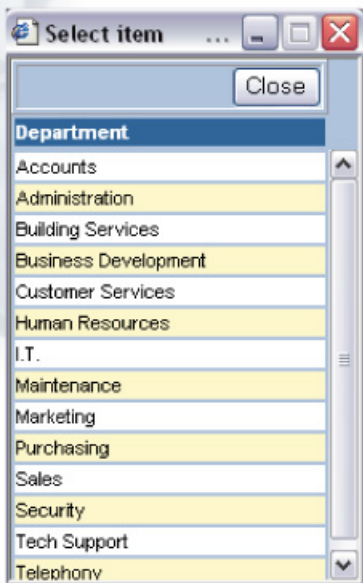

- Intuitive User Interface
- Full range of Search Filters
- Sub-second Search Results
- Browser-based or Executable interface
- User Definable Sort Order
- Print / Export Search Results

### ADMIN FEATURES

- Update Directory Database
- Customizable Data Fields
- Control of Multi-User Login Security
- Import Data from File
- Control of Data Fields displayed to Users

### BENEFITS

- A logical solution for smart businesses where up-to-date information is essential
- No need for publishing expensive paper directories
- Information easily updated or imported from a file
- Administrator has control over information and can include any additional data.

Directory allows you to select columns to sort on.

Quick-selection lists available on all Search and Edit features.

## INTEGRATION

Phoneware's Integration Module is a memory-resident service which ensures that any changes made to Identifiers (Last Name, First Name, Department, Email, etc.) in Directory are synchronized with PhoneMaster and CallBill, and vice versa. This eliminates the need for updating personnel data separately in each of the applications.

### INTEGRATION

Real-Time Transparent  
Product Integration

## OTHER PHONEWARE PRODUCTS

First launched in 1996, PhoneMaster is widely acknowledged as being the easiest-to-use and most robust Switch Administration package for Meridian telephone systems in the market. Phoneware proudly announces the birth of PhoneMaster Version 4, which includes IP Telephone administration, Corporate Directory, and full integration with CallBill and Directory.

CallBill is a leading-edge Call Accounting product that finally brings to the market a level of flexibility that was previously only dreamt of. CallBill's Report Design Module gives you full control over designing the reports you want and allows you to present report data in a format that suits you.
